

# E-Tools for easy selection of low voltage switches

## CamWeb, EOT and Switches

Our selection tools are user friendly tools that rule out wrong selection. We offer three selection tools that are used to make product selection and configuration as easy as possible. Our selection tools can be found on: <http://switchselector.com/>

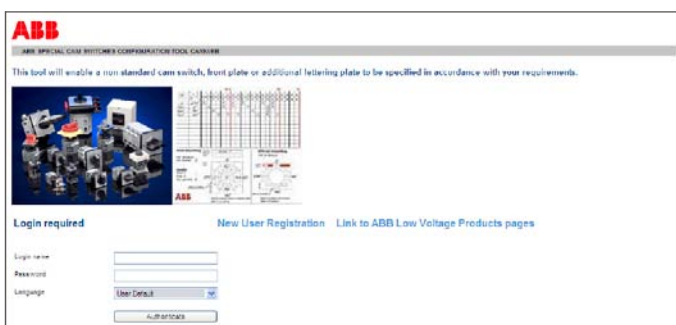

ABB SPECIAL CAM SWITCHES CONFIGURATION TOOL CAMWEB

This tool will enable a non standard cam switch, front plate or additional lettering plate to be specified in accordance with your requirements.

**Login required**      [New User Registration](#)      [Link to ABB Low Voltage Products pages](#)

Login name:   
Password:   
Language:

You can get your own User name and Password by clicking the “New User Registration” link and filling out the registration form.

### CamWeb

This tool enables non-standard cam switches to be specified according to your requirements, types are generated automatically. CamWeb is available in eight languages.

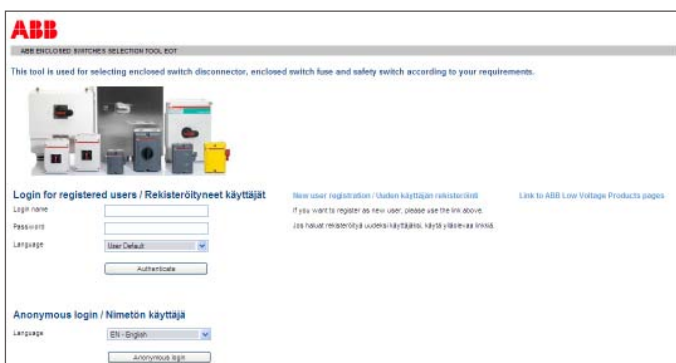

ABB ENCLOSED SWITCHES SELECTION TOOL, EOT

This tool is used for selecting enclosed switch-disconnector, enclosed switch fuse and safety switch according to your requirements.

**Login for registered users / Rekisteröityneet käyttäjät**      [New user registration / Uuden käyttäjän rekisteröinti](#)      [Link to ABB Low Voltage Products pages](#)

If you want to register as new user, please use the link above.  
Jos haluat rekisteröityä uuden käyttäjänä, käytä yllä olevaa linkkiä.
