# TruckMaster

## Remotely is safer

TruckMaster is the portable remote racking unit implementing the remote racking operations of the circuit breakers, offering a new level of safety to medium voltage operators.

### Safety

- Increased personnel safety thanks to the long distance between the circuit breaker and the operator
- Enhanced switchgear operability preventing human error related to manual operations

### Technology

- State-of-the-art MV equipment
- Type tested according to latest Standards

### Installation

- Easy switchgear upgrade
- Best implementation during retrofit commissioning

### Operation

- Easy application of the portable driver to the switchgear door
- User-friendly ergonomic console
- Equipment position indicated remotely
- Emergency pushbutton on the console
- Mechanical interlocks are preserved for manual operations
- Easy storage in the switch-room

### Investment

- Cost effective way to bring the operator to a new level of safety
- Optimized investment thanks to the use of a single portable device for the whole line up
