

2018 Life Cycle Management

ABB Italy medium voltage products

Life Cycle process

Product status plan

ABB's products are designed for continuous evolution. It is ABB's goal to protect our customers' investment beyond the life-cycles of the underlying platform products. Life Cycle Management process is split into four steps in order to allow both ABB and the customers to properly manage the transition from Active to Obsolete in a long term way and avoid a too short swap which may generate critical situations.

Scope of this brochure is to provide life cycle status of all products under responsibility of Service Center of Medium Voltage Products:

ABB S.p.A.

Via Friuli, 4

24044 Dalmine

Italy

Our Service Center is responsible for:

- All designed and manufactured medium voltage product with SACE logo
- Replacement of all MV apparatus produced by ABB Italy Dalmine factory
- Retrofit apparatus for replacing ABB HPA gas insulated circuit breakers and contactors designed and manufactured by ABB Sweden for fitting SafeSix switchgear.

The document is updated once per year according to the latest announced shifts. Special care of the obsolete products is taken in order to support the customers either with spare parts or retrofit solutions with active equipment.

Status	Name	Product	Type	Current status start date	Next shift
Active	ADVAC	Circuit-breaker	Vacuum	-	-
	AMVAC	Circuit-breaker	Vacuum	-	-
	DCBreak	Circuit-breaker	Magnetic-air	-	-
	DS1	Capacitor switch	Dry-air	-	-
	GSec	Switch	SF6	-	-
	HD4 ⁽¹⁾	Circuit-breaker	SF6	-	-

	SRC	Contactactor	SF6	01/04/2012	-
	UniArc	Switchgear	AIS	01/07/2015	-
	UniSwitch 36	Switchgear	AIS	-	-
	Univer G36	Switchgear	AIS	01/07/2015	-
	VRB	Circuit-breaker	Vacuum	-	-
	VRC	Contactactor	Vacuum	31/03/1999	-
	ZS1 ⁽³⁾	Switchgear	AIS	01/07/2015	-

Notes:

- 1) Replacement of enclosure manufactured after 1985 is available
- 2) Circuit breakers manufactured before 1984 include asbestos components inside the arc-chutes
- 3) ZS1 switchgear is different from UniGear ZS1 which is active

Spare parts and retrofit solution availability

Products details

Spare parts have been categorized into groups as per the following:

- Poles: assembly parts in which main interruptive components are installed in
- Mechanism: operating mechanism which drives the interruptive parts
- Auxiliary equipment: LV equipment onboard the operating mechanism (spring charging motor, coils, magnets, contacts, etc.)
- Tulip contacts: moving contacts onboard the apparatus arms
- Complete device: for those products which cannot be split into sub-assemblies
- Monoblocs: spouts, shutters and branches
- Earthing switch: earthing switch and relevant accessories

- Line disconnecter: line disconnecter and relevant accessories
- LV compartment devices: protection relay, auxiliary relays, MCB and terminal board

The following charts give an overview of the currently available spare parts in our stock and retrofit solutions for replacing phased-out equipment with active products. Spare parts in "Not ensured" status could become "Not available" during the year depending on requests. Please contact ABB for checking availability. See relevant 2018 Life Cycle Management for marine application.

Obsolete apparatus and relay				Active products		Spare parts			
Name	Product	Type	Retrofit solution	Poles	Mechanism	Auxiliary equipment	Tulip contacts	Complete device	
DIARC ^{(1) (3)}	Circuit-breaker	Magnetic-air	HD4, VD4						
eVM1	Circuit-breaker	Vacuum	VM1+met.&prot.						
HA/BEU	Circuit-breaker	SF6	HD4/BEU available only for HA3/BEU 24/36kV 1250A 25/32KA						
HA1-2-3	Circuit-breaker	SF6	HD4, VD4						
HAD	Circuit-breaker	SF6	HD4, VD4						
HAR	Circuit-breaker	SF6	HD4, VD4						
H-Breaking	Circuit-breaker	SF6	HD4, VD4						
HM1	Circuit-breaker	SF6	n.a						
PR511 ⁽²⁾	Relay	Digital	PR521, REF601						
PR512 ⁽²⁾	Relay	Digital	REF601, REJ603						
REF542 ⁽²⁾	Relay	Digital	REF542plus release 3.0, Relion® family						
REF542plus release 1.x ⁽²⁾	Relay	Digital	REF542plus release 3.0, Relion® family						

Notes:

1) Arc chambers are not available

2) Replacement with site adaptations

3) AE mechanism and its components are not available

	Not available
	Not ensured
	Available
	Not applicable

Lyfe cycle services

Tailor-made services for every life cycle stage

The whole world of ABB services hereby represented is at your disposal for making the best use of ABB medium voltage assets at every life cycle stage:

Active

- Long-term support thanks to Power Care customer support agreements
- Extended warranty application
- Worldwide Service competence, ready for prompt actuation
- Certified ABB spare parts ready in stock to guarantee their availability throughout the product life time (Active, Classic and Limited stages)

Classic

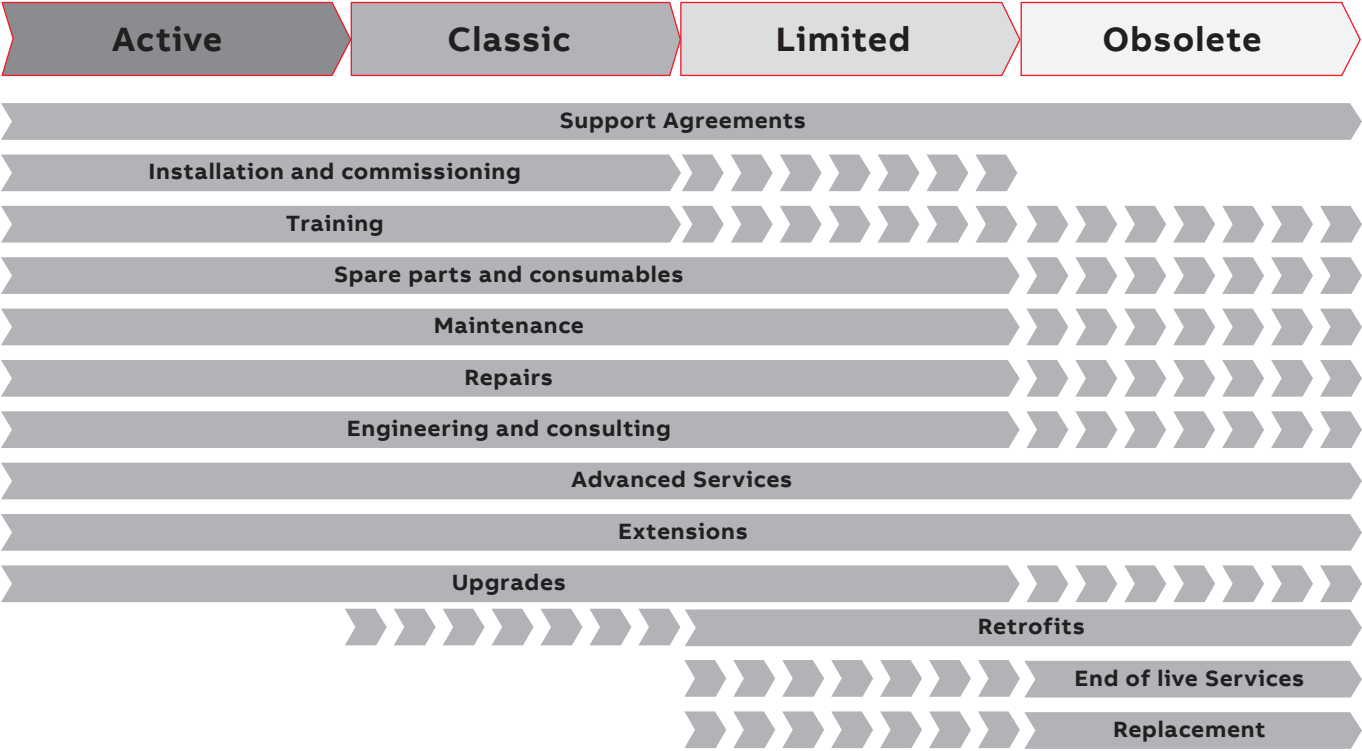

- “Last Buy” opportunity of complete equipment
- Good chance to obtain spare parts as per active products conditions
- Best time to keep equipment healthy via Power Care customer support agreements
- Call for training with wide coverage thanks to worldwide footprint still available.

Limited

- Spare parts fully available
- Retrofit solutions can already be applied
- Power Care customer support agreements designed to keep the service experience as per active products

Obsolete

- Spare parts could be still accessible on request.
- Retrofit solutions are usually available. The use of active products allows a new life to be given to the plants.
- Our consultancy services are always available for supporting cost-effective and optimized investments. Special care is given to obtain a soft shift to new applications and solutions.
