TwinLine S 43

The new modular wall-mounting and floor-standing cabinets

1

TwinLine S 43

The new modular wall-mounting and floor-standing cabinets

With the new TwinLine S 43 system, ABB offers a tailored and proven concept of modular wall-mounting and floor-standing cabinets.

This fully comprehensive product range includes two cabinet types TwinLine-G (depth of 225 mm) and TwinLine-L (depth of 275 mm) and provides a solution for every application. All cabinets are designed according to IEC 61439. The modular system is simple in planning, quick in assembly and safe in application.

A wide range of flange types provides the right solution for every application. All flanges are suited for all flange openings and knockouts of the complete TwinLine series. The flanges can be attached without the need of tools thanks to the handy push and lock technology.

All TwinLine cabinets can be connected in both, horizontally and vertically directions. Uprights for side-by-side positioning and connection sets for stacking the cabinets can be easily installed. The new plinth concept provides a safe transport in the workshop and on-site. The standard heights of 50 mm and 100 mm can be stacked and combined in order to fulfil installation needs.

TwinLine offers unrestricted access during operation, expansion, maintenance and functional monitoring. With its 180-degree door opening and the door locking system, with the possibility to switch the door hinges from right to left it guarantees excellent flexibility. The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick assembly.

With its wide range of the new modular distribution panel system, called CombiLine S, ABB offers the right solution for every application. The internal configuration system fits in all TwinLine S 43 cabinets. CombiLine S provide a time-saving installation due to hook-in technology and a simple closure system for covers with the $\frac{1}{4}$ turn quick-lock. With its new mounting concept for the CombiLine S system, TwinLine provides more flexibility and access for installation and wiring. There is also the option to have continuous mounting plates that can be adjusted in depth.

Product benefits

- Innovative flange technology
- Significantly more usable area for cable entry
- All flanges are compatible with all flange openings and knockouts within the entire TwinLine system
- Simple connection of all cabinets in both, horizontally and vertically
- Modular plinth concept
- Optimal accessibility and ease of installation thanks to 180 degree door opening angle
- Wide range of the new modular distribution panel system, called CombiLine S
- Simplified accessories concept for reduced inventory levels
- Speedy and concise planning and calculations with the software

TwinLine S 43

The complete cabinet system in all sizes

1

With the new TwinLine S 43 system, ABB offers a tailored and future-proof concept of modular wall-mounting and floor-standing cabinets. This fully comprehensive product range includes two cabinet types TwinLine-G (depth of 225 mm) and TwinLine-L (depth of 275 mm) and provides a solution for every application.

All cabinets are designed according to IEC 61439. The modular system is simple in planning, quick in assembly and safe in application. Highlights such as the innovative flange technology, optimal accessibility, ease of cabinet connection, the modular plinth concept and a flexible assembly of the new internal configuration, guarantee a modern energy distribution.

TwinLine S 43

Product benefits

1

The complete cabinet system in all sizes

The fully comprehensive product range of modular wall-mounting and floor-standing cabinets includes the types TwinLine-G (depth of 225 mm) and TwinLine-L (depth of 275 mm) and provides a solution for every application. All cabinets are designed according to IEC 61439. The modular system is simple in planning, quick in assembly and safe in application.

> The complete cabinet system in all sizes see page 7

Innovative cable entry

A wide range of flange types provides the right solution for every application. All flanges are suited for all flange openings and knockouts of the complete TwinLine cabinets. The flanges can be attached without the need of tools thanks to the handy push and lock technology.

> Innovative cable entry see page 10

Simple connection in series of all cabinets

All TwinLine cabinets can be connected in both, horizontally and vertically directions. Uprights for side-by-side positioning and connection sets for stacking the cabinets can be easily installed.

> Simple connection in series of all cabinets see page 12

Time-saving plinth installation and safe transport

The new plinth concept provides a safe transport in the workshop and on-site. The plinth contains knockouts and has the possibility to install wiring ducts for cable support. The standard heights of 50 mm and 100 mm can be stacked and combined in order to fulfil installation needs.

> Time-saving plinth assembly and safe transport see page 13

TwinLine S 43

Product benefits

1

Optimal accessibility and ease of installation

TwinLine offers unrestricted access during operation, expansion, maintenance and functional monitoring. With its 180-degree door opening and the door locking system, with the possibility to switch the door hinges from right to left it guarantees excellent flexibility.

> Optimal accessibility for installation see page 14

Removable frame for CombiLine S covers

With its wide range of the new modular distribution panel system, called CombiLine S, ABB offers the right solution for every application. The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick assembly.

> Internal configuration system see page 14

Flexibility in the assembling of internal configuration

With its new mounting concept for the CombiLine S system, TwinLine provides more flexibility and access for installation and wiring also outside of the cabinet. There is also the option to have continuous mounting plates that can be adjusted in depth.

> Flexibility in the assembling of the internal configuration see page 15

The right internal configuration for every type of application

The wide range of the internal configuration system CombiLine S fits in all TwinLine S 43 cabinets. CombiLine S provides a time-saving installation due to hook-in technology and a simple closure system for covers with the 1/4 turn quick-lock.

> The right module for every type of application see page 48

TwinLine S 43

Innovative cable entry

1

The usable cable entry area is one of largest cable entries available on the market. A wide range of flange types provides the right solution for every application. All flanges are suited for all flange openings and knockouts of the complete TwinLine cabinets. The flanges can be attached without the need of tools thanks to the handy push and lock technology.

- All flanges are compatible with all flange openings and knockouts within the entire TwinLine system
- Wide range of new flanges
- Tool-free flange installation thanks to push and lock technology

Membrane flange

- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology
- Optimal cable entry by a combination of hard and soft components
- Additional fixing and centring

Flange for M screw fittings

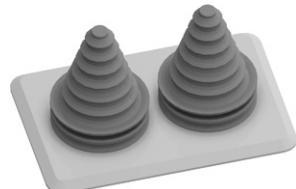

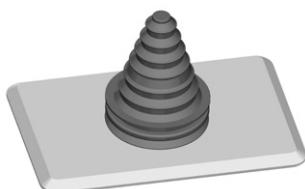

- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology
- With two different hole patterns

> Flanges see page 24

TwinLine S 43

Innovative cable entry

1

Flange with cable sleeves

- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology

Closing flange

- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology
- Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

Closing flange

- With foam seal around perimeter, material: sheet steel 2 mm
- Continuous protective earth connection via flange fastener
- Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

> Flanges see page 24

TwinLine S 43

Simple connection in series of all cabinets

1

All TwinLine cabinets can be connected in both, horizontally and vertically directions. Uprights for side-by-side positioning and connection sets for stacking the cabinets (up to 255 kg) can be easily installed.

TwinLine S 43

Time-saving plinth assembly and safe transport

The new, innovative cabinet plinth literally forms the foundation of the TwinLine floor-standing cabinets while providing the perfect answer to the requests from the field for greater ease of installation. The plinth consists of four parts: the already connected corner and side parts and the front and back trim covers.

Removing the front and back trim covers makes transport more secure. You want to connect a cabinet in series? Not a problem with this cabinet plinth, since cable ducts and M-screw fittings can be fed through knockouts in the side parts.

To ease cross wiring it is also possible to integrate cable ducts. The plinths are available in heights of 50 and 100 mm and can be stacked or combined.

Plinth with 50 and 100 mm height

- Innovative cabinet plinth for easy installation
- Up to three plinths can be “stacked” on top of each other (no additional accessories needed)
- The plinths of 50 and 100 mm height can be combined

Plinth with 100 mm height

- Optimal feed-through of cables using the side knockouts for cable ducts or cable screw fittings
- Quick cable duct installation in the plinth

Plinth with wiring duct

TwinLine S 43

Optimal accessibility for installation

1

The new series of cabinets also offers impressive accessibility with their 180-degree door opening angle. The removable frame for covers enables optimum access during operation, maintenance and function monitoring.

- The door opening angle is 180 degrees for both, individual cabinets and cabinets connected in series
- The innovative locking system is easy to install and allows you to quickly modify the door hinge
- Removable frame as standard makes it possible to remove all covers in one handling
- Significantly reduced installation time

Doors with 180 degree opening angle

TwinLine offers unrestricted access during operation, expansion, maintenance and functional monitoring. With its 180-degree door opening and the door locking system, with the possibility to switch the door hinges from right to left it guarantees excellent flexibility.

Removable frame for CombiLine S covers

With its wide range of the new modular distribution panel system, called CombiLine S, ABB offers the right solution for every application. The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick assembly.

TwinLine S 43

Flexibility in assembly

Flexibility in the assembling of the internal configuration
With its new mounting concept for the CombiLine S system,
TwinLine provides more flexibility and access for
installation and wiring.

1

Depending on the customers requirements there are
two options to install and wire the internal configuration:

- Outside of the cabinet to have access from all sides
- Placed horizontally on two trestles to do the assembling
and wiring inside the cabinet

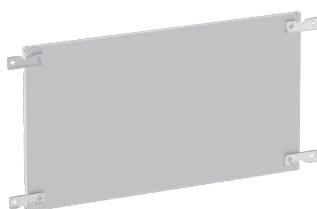

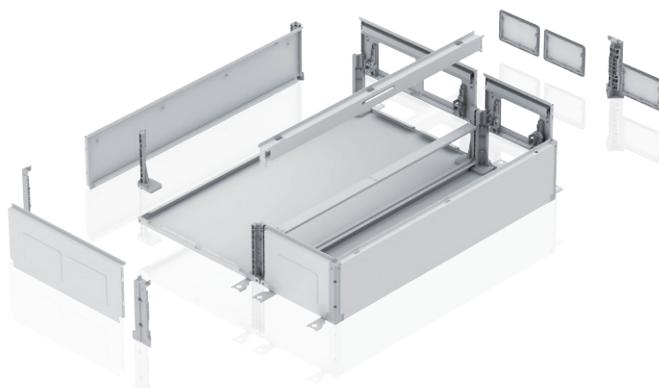

There is also the option to have continuous mounting
plates that can be adjusted in depth.

System pro E combi CombiLine S distribution panel system

Simple in planning

Quick in assembly

2

Safe in application

System pro *E* combi CombiLine S distribution panel system

2

The highly sophisticated quick mounting system from ABB makes the completion of modular cabinets with distribution panels an effortless process. Simple, quick and safe – these are the three attributes of this system that speak for themselves.

TwinLine makes internal configuration fun, with a modular system of wall-mounting and floor-standing cabinets for the modular CombiLine S distribution panel system. The wide range of the CombiLine S offers the right solution for every application. One internal configuration System for all cabinets.

All of the individual parts required for assembling are packed separately and supplied in the form of a set.

The benefits: These sets allow you to take a flexible approach towards stock keeping, and avoid a time-consuming search for system parts such as brackets, screws or fastening elements. The instructions supplied with the system make assembly a child's play. Quick and clear planning and calculation become perfect with planning software.

CombiLine S distribution panel system

Product benefits

2

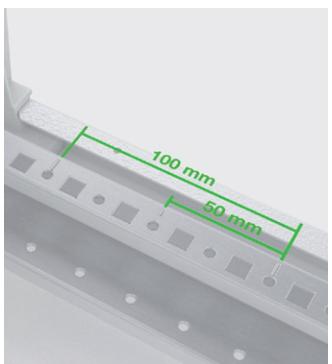

One internal configuration system for all cabinets

All internal configuration and the busbar system for the cable containers up to 400 A fits in both cabinet depths. The internal configuration up to 800 A and the busbar system behind the device area also fits in a 275 mm cabinet depth.

Flexible in assembling

With its new mounting concept CombiLine S provides more flexibility and access for installation and wiring. Placed horizontally on two trestles, the assembly and wiring is very comfortable. An other option is to swing-out the whole internal configuration to have access from all sides.

Assembly of internal configuration

CombiLine S provide a time-saving installation due the hook-in technology. This quick assembly limits the numbers of screws. Markers in 50 mm grid are on the mounting profiles for simple positioning.

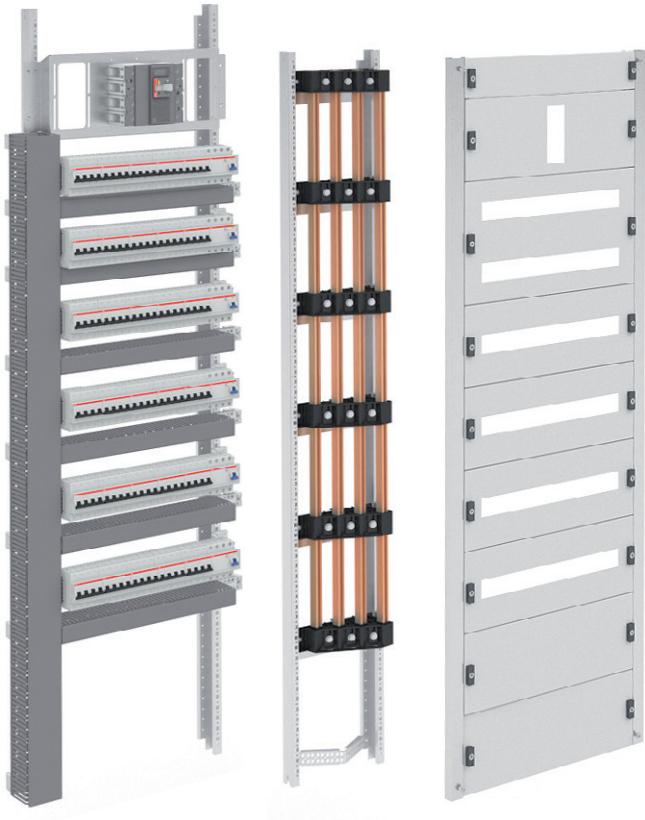

Easy handling of covers

Time-saving fixation and adjustment as well as the simple closure system with 1/4 turn quick-lock provides easy handling of the covers and standard earth connection. When using devices in the covers a safe earth connection is guaranteed through 6 mm² cable with ring shoes on both sides. Optimal accessibility give the hinge set with 90 degree opening angle.

CombiLine S distribution panel system

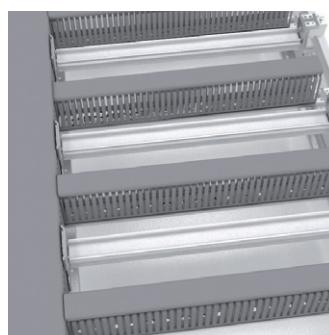

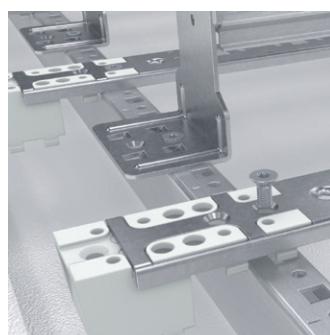

Product benefits

Optimal accessibility and ease of installation

The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick access.

2

Wiring system

One support for different dimensions of wiring ducts; to have the same level for horizontal and vertical usage. An additional profile for stabilization of wiring duct and for mounting wire holders is available.

Form of internal separation up to form 2b

For the busbar system behind the device area is a horizontal transparent partition available. To separate the busbar system in external cable container it is possible to use a vertical separation.

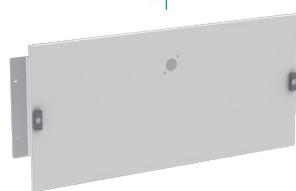

CombiLine S distribution panel system

The right module for every type of Application

No. 2 flexible busbars, section 32 x 5	2000	630	BF4012			2

Distribution busbars with shaped section						
Busbar $I_n = 400$ A	1730	400	BA0400			1
Busbar $I_n = 800$ A	1730	800	BA0800			1

Flat busbar						
Copper busbars drilled and threaded for rapid connection of the conductors						
Can be used with both linear CKBS1161, CKBS1181 and scaled CKBS1231 busbar holder						
No. 2 copper busbar 15 x 5	1750	250	BR0250			2
No. 2 copper busbar 25 x 5	1750	400	BR0400			2
No. 2 copper busbar 30 x 10	1750	630	BR0630			2

Earthing busbars*						
Busbar can be mounted directly on the mounting profile or busbar 20 x 5 mm on the support for horizontal installation;						
Copper busbars drilled and threaded for rapid connection of the conductors						
No. 2 earthing busbars 20 x 5 threaded M6	2000		EV1119			2
No. 2 earthing busbars 25 x 5 threaded M6	2000		EV1120			2
No. 2 earthing busbars 50 x 5 threaded M6	2000		EV1121			2

Support universal, for horizontal installation						
For a Din rail or cable fastening rail or earth busbar max. 20 x 5 mm			CASHP2	2CPX078450R9999		2
For fix mounting			CASHP50	2CPX078451R9999		50
Material is metal						

* Busbar dimensions can be selected according to IEC 61439-1 table 5

CombiLine S distribution panel system

Distribution system Unifix, overview

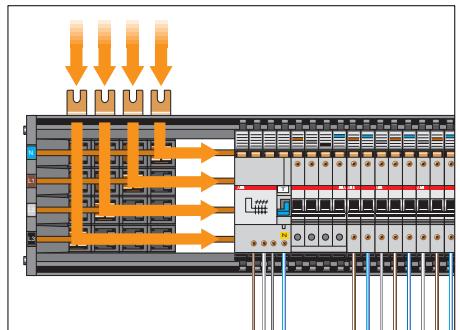

2

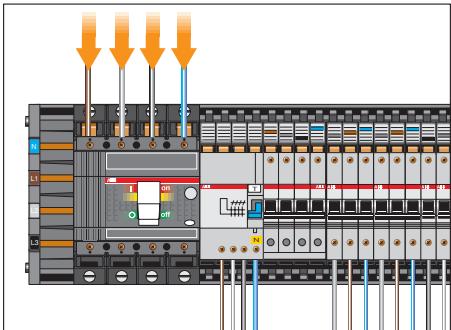

Direct connection with the 400/800 A system of busbars with shaped section.

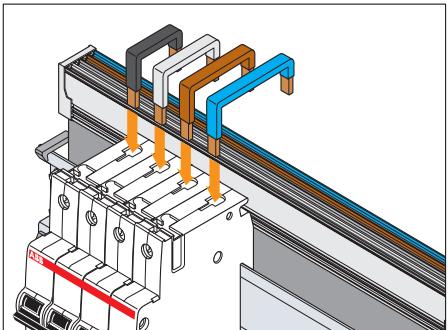

Feeder module for 400 A frame (L1-L2-L3-N).

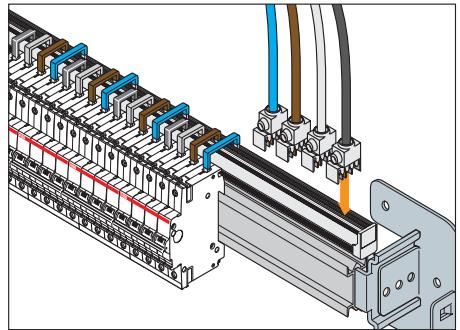

Direct power supply of the bases by means of feeder module ED2209.

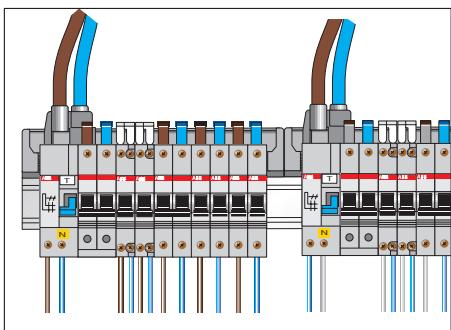

Power supply by means of general row circuit-breaker.

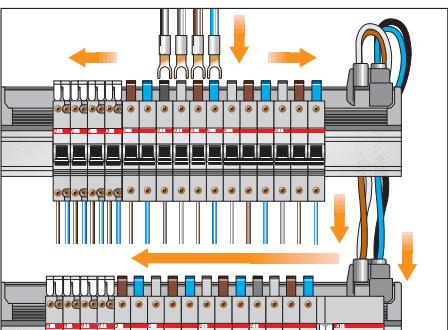

Connections (L1-L2-L3-N) for System Pro M modular apparatus.

Power supply of the busbar with 100 A feeder module without cable. Terminal capacity 35mm².

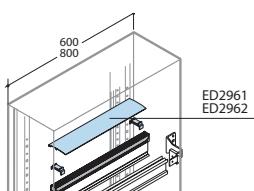

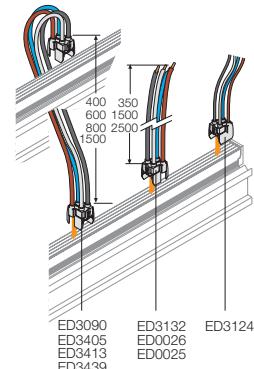

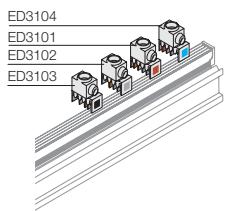

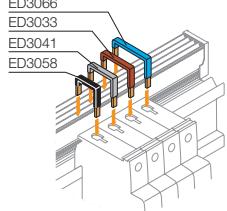

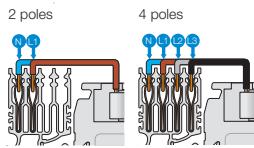

Direct power supply of the busbars by means of feeder module.

Power supply by means of modules and cables in parallel.
