Executive Summary

This product update is to announce a life cycle change affecting Combustion Instrumentation product:

- Carbon In Ash (CIA) Instrument
- will transition to “OBSOLETE” effective December 15th, 2015

Products Concerned

Product Name	Version	Comments
Carbon In Ash	5.02	This product includes the following assemblies: <ul style="list-style-type: none">- Transmitter assembly (Mirror, μWave, Align)- Receiver assembly (Mirror, μWave, Align)- Digital acquisition board (DAS)- CIA setup tool- Dust Probes

Description

Due to the very low marked demand of this type of equipment reported in the last 10 years and both the increased manufacturing cost and availability issues of the critical components, decision has been taken to withdraw the Carbon In Ash (CIA) instrument from the sales and transition the Life Cycle to "Obsolete".

ABB has no plan for replacing this instrument in the future.
