

Service note

UNITROL® P Communication Package

The easy way to connect with your UNITROL® system

The Communication Package connects state-of-the-art performance with specific features for your UNITROL P system.

FUPLA 2 is a comprehensive communication software package, designed exclusively for UNITROL P. It is accessed through a Panasonic Toughbook and lets the user design, modify or update the UNITROL P, depending on specific application demands.

Communication package (HW/SW)

- Fully-rugged and shock resistant design
- Serial connection
- Engineering for the emulation of DOS on Windows XP platform
- Specific UNITROL P software (FUPLA 2)
- PCMCIA interface
- Protocol converter (HW)
- Training on demand
