

## ACS5000 air cooled

### Current lifecycle status

The ACS5000 air cooled drive is in the Active phase according to the ABB life-cycle model outlined above.

### Lifecycle plan

The ABB life-cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

ABB will adequately inform about life-cycle phase transition from Active to Classic phase prior to change. It is planned to keep ACS5000 air cooled in the Classic phase for approximately 10 years once it has been transferred to Classic phase.

### Recommended actions

In Active phase complete life-cycle services are available for ACS5000 air cooled. No further actions are required.

### Further information

For more information on drives life cycle management and available services contact your local ABB organization or at [www.abb.com/drives](http://www.abb.com/drives).
