

Current Limiting Fuses, CEF

Rated voltage: 3/7.2-36 kV

Rated current: 6-200 A

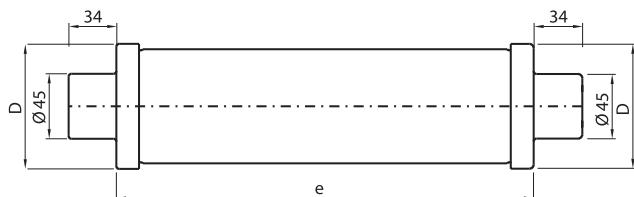

The CEF current limiting fuses design is based on overload spots that significantly reduce fuse structure temperature during interruption process. Additionally, thanks to last modification of striker pin functionality that release can be now temperature dependent – Temperature Control Unit (TCU) – increase application safety for gas insulated panels.

Main features:

- low minimum breaking current,
- low power losses, specially suitable in compact switchgear and ring main units,
- high breaking capacity,
- high current limitation,
- type tested acc. to IEC 60282-1,
- dimensions acc. to IEC 60282-1 and DIN 43625,
- the CEF is equipped with Temperature Control Unit, which protects against high temperature in enclosed compartments,
- equipped with medium type striker, which is activated immediately when the fuse-elements melt,
- unified voltage ratings for more application flexibility,
- single fuse version for both indoor and outdoor operating conditions,
- graved fuse data for long term fuse recognition,
- welded current path secures stable electrical contacts with active breaking elements.

Available fuses ratings and dimensions, rated currents are listed in single cells

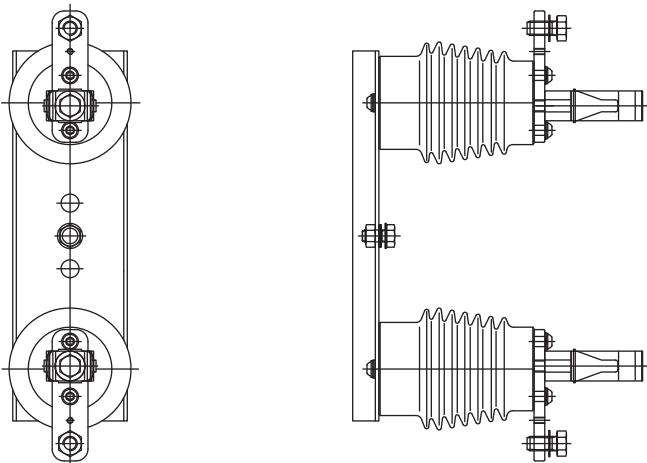

Rated voltage [kV]	Dimensions e[mm]/D[mm] & Rated current I _n [A]													
	e=192			e=292			e=367			e=442			e=537	
	D=65	D=87	D=53	D=65	D=87	D=65	D=87	D=53	D=65	D=87	D=65	D=87	D=65	D=87
3/7,2	6;10; 16;25; 40;50;63	80; 100		6;10; 16;25; 40;50;63	80;100;125; 160;200		125;160; 200
