

## Course description

# GBW308

# System 800xA

# System Maintenance & Troubleshooting

## Course goal

The goal of this course is to learn how to troubleshoot the ABB Extended Automation System.

## Learning objectives

Upon completion of this course, students will be able to:

- Explain the System 800xA architecture and the function of the different components
- Explore 800xA Files
- Troubleshoot Networked devices
- Connect to 3<sup>rd</sup> Party OPC Server
- Fault find OPC Issues
- Export and Import Aspects and Objects
- Explain the connection between Microsoft and 800xA Security
- Take complete Backup of a system
- Recover a system from a Black-Start
- Explain the function of the Domain Controller in the 800xA System

## Participant profile

This training is intended for first level maintenance and service personnel.

## Prerequisites

Students shall know the fundamentals of working with Control Systems and have basic knowledge of Microsoft Windows.

## Topics

- System 800xA Architecture
- 800xA File Structure
- Windows 2012 Domain Controllers in 800xA Environment
- Security
- Adding New Users to the 800xA System
- Group policies
- Networking
- RNRP
- Troubleshooting Aspect Server
- Troubleshooting Connectivity Server
- OPC Connectivity
- Import/Export
- 800xA System Backup and restore
- Black-Start

## Course type and methods

This is an instructor led course with interactive classroom discussions and associated lab exercises. Approximately 50% of the course is hands-on lab activities.

## Duration

The duration is 5 days.
