

UniGear switchgear

Safety, reliability and performance

UniGear is ABB's highly flexible air-insulated, medium-voltage switchgear for primary distribution installations. It is the first 'one size fits all' platform of its kind in the 12-24 kV range. Suitable for use in power plants, utility and indus-

trial applications, transportation and the marine sector, it is designed to meet the most demanding international standards for safety, reliability and performance.
