
ABB in Finland

The pioneering technology leader

Key figures for 2017

Net sales: € 2,273 million

Number of employees: 5300

R&D: 131 million

- ABB is a pioneering technology leader in electrification products, robotics and motion, industrial automation and power grids, serving customers in utilities, industry and transport & infrastructure globally. Continuing a history of innovation spanning more than 130 years, ABB today is writing the future of industrial digitalization with two clear value propositions: bringing electricity from any power plant to any plug and automating industries from natural resources to finished products. As title partner of Formula E, the fully electric international FIA motorsport class, ABB is pushing the boundaries of e-mobility to contribute to a sustainable future. ABB operates in more than 100 countries with about 147,000 employees of whom around 5,300 in Finland.
- ABB is one the leading industrial employers in Finland and the biggest employer in the capital region of Helsinki. In addition, the company is a remarkable provider of maintenance and life cycle services. The plant locations are Helsinki, Vaasa, Porvoo and Hamina.
- ABB is a technology leader company and one of the strongest product developers in Finland. In 2017, ABB invested €131 million in research and product development.
