Technology and Users Group Update Road Show 2014

ABB invites you to attend a FREE educational seminar to discuss what's new in the power and water industry. The only requirement is that you show up ready to learn and engage with leaders in automation technology.

At the show, we will be launching enhancements to Symphony™ Plus! Join your power and water peers for a Users Group feedback session at the end of the day as well as several hands on demonstrations. ABB experts will help you plan for future market needs and answer your questions and concerns. The event will take place over the course of one day and be fully catered. ABB will make this worth your while!

Join us for an event at one of these five locations:

Road Show	Date
Richmond, VA Richmond Marriott West 4240 Dominion Boulevard Glen Allen, VA 23060	March 19, 2014 8:00 AM - 5:00 PM
Nashville, TN Omni Nashville Hotel 250 5th Ave S Nashville, TN 37203	May 19, 2014 8:00 AM - 5:00 PM
Edison, NJ Hilton Garden Inn Edison 50 Raritan Center Parkway Edison, NJ 08837	June 3, 2014 8:00 AM - 5:00 PM
St. Louis, MO Embassy Suites St. Louis 610 North 7th Street Saint Louis, MO, 63101	August 26, 2014 8:00 AM - 5:00 PM
Las Vegas, Nevada JW Marriot 221 N Rampart Blvd Las Vegas, Nevada 89145	Special Two Day Event September 16-17, 2014 7:30 AM - 5:00 PM (both days)

Join your power and water peers for a Users Group session

You will hear about updates to activities as well as thoughts from your Steering Committee. Here is your chance to ask questions, share your experiences, and network. Take this opportunity to discuss your operational challenges. And don't forget about our secure website (www.adscsug.com). Register today!

Registration is completely free

Breakfast, lunch, and cocktail reception are included in the free registration. Each participant is responsible for his or her transportation and lodging.

Talk to your ABB account manager for more information and register online today!

What to look forward to at the show?

A host of ABB experts

At the shows, you'll be able to talk one-on-one with ABB experts and experience hands on demonstrations.

Symphony Plus

Come and see the exciting, newest releases in the control and I/O product family of Symphony Plus. These new portfolio additions provide a scalable and energy efficient control system. On hand will be the latest equipment, all the way from Operations to I/O, affording you the opportunity to roll up your sleeves and put the system to the test!

Advanced Alarm Management Tools integrated with your HMI

Alarm systems are often the back stop for controlling process safety incidents, but are often not effective due to alarm flooding or inadequate response to alarms. The need for a sophisticated alarm management system is great, helping operators handle the most demanding and critical situations, avoiding costly downtime. A hands-on demonstration will be available.

Securing your DCS

DCS security and the management of a compliant system is one of the most highlighted concerns by control system maintainers within the Power Generation industry. Come learn about Security Workplace, a scalable solution to help efficiently manage plant cyber security in a comprehensive manner.

Turbine Control

Learn about our S+ Steam and Combustion Turbine Control scheme and product offerings including generator autosynchronization, turbine governor, turbine protection, surge protection, valve positioning (TMR & simple redundant), and turbine supervisory / condition monitoring. Our full turbine mechanical/hydraulic capabilities will also be on discussed from simple manifold and actuator refurbishments to full EHC retrofits. Lastly, the integration of our turbine control systems into the latest S+ Operations HMI will be on display with an FT8 low emissions aero-derivative combustion turbine simulator.

How ABB can extend the value of a simulation system

Learn how a simulation system supports continuous improvement programs in Operational Excellence. These include solutions in alarm management, optimization, high performance HMI, and security. ABB's Plant Performance Simulation Solutions position ABB as the one-stop-shop for designing scenarios and training programs. This solution focused approach will highlight how ABB can build upon a simulator to obtain a plant's operational goals.

ServiceGrid

ServiceGridSM delivers service solutions to match the operational and maintenance needs of our power and water customers. Discover how through planned delivery, ServiceGrid can transform routine maintenance tasks and free resources to proactively focus on power production.

eBOP Solutions

ABB has the engineering capability, experience and its own technologies to deliver turnkey system integration of eBOP (electrical balance of plant) solutions, specifically tailored to different power plant types; such as oil and gas fired combined cycle power plants, coal fired boiler power plants and hydro power plants, as well as industrial sized turbine and boiler power applications.

Sample Agenda:

	Topic
8:00 AM	Continental breakfast & registration
9:00 AM	Welcome
9:15 AM	New Symphony Plus products
10:45 AM	Break
11:00 AM	Symphony Plus hands on demonstration
12:00 PM	Lunch
12:45 PM	Securing your DCS
1:25 PM	Turbine control and condition monitoring
2:10 PM	Value of simulation systems
2:30 PM	Break
2:45 PM	ServiceGrid and eBOP Services
2:55 PM	Advanced Alarm Management Tools integrated with your HMI and demonstration
4:00 PM	Users Group feedback session
5:00 PM	Reception
