

More UPS for less cost Modular UPS for availability and low cost of ownership

ABB's innovative modular UPS provides best-in-class UPS functionality while keeping a lid on costs. Modular UPS is fully scalable, so you just have to install, power and cool

however many modules you need – and slot new ones in later, as required. The modules are standardized and can be online-swapped – this cuts maintenance overhead and

inventory costs. A compact design that takes up less real estate and superb energy efficiency saves even more. Start saving now at www.abb.com/ups
