

Course description

G3867e

ACS880 Artificial oil pumping control programs Internet course

Course type

Internet course

Course Duration

The course duration is approximately 20 minutes.

Course Goal

The goal of this course is to give an overview of the different artificial oil lifting systems and their respective control program features.

Student Profile

This course is intended for sales, sales support, service, product management, field service, commissioning, and end customer personnel.

Prerequisites

- n Basic knowledge of ACS880
- n An Internet connection. The recommended browser is Microsoft Internet Explorer.

Notes

If you have no experience of working with drives, it is highly recommended to take a hands-on course in addition to this course, to be able to utilize the drive to its full potential.

Course Objectives

After this course you will be able to:

- n Explain product argumentation
- n Describe product features
- n Configure the product according to hardware and software requirements

Main Topics

- n Different artificial lift systems
- n Control program features for
 - o Sucker rod pumps
 - o Electrical submersible pumps
 - o Progressive cavity pumps

Low voltage drives training
