

Customized solution improves customer compliance

Performance improvement: instrument enclosures to maximize data availability for water and wastewater Industry

Customer needs

Regulatory requirements for safe handling of wastewater rose annually. Telemetry data quality and control of signal degradation is key to measure, maintain and store water

ABB's scope

ABB already supplies WaterMaster flowmeters. Despite the high product quality, the signal availability could be improved through engineered enclosures for the supplied flowmeters.

Customer benefits

- 1.Improved regulation compliance
- 2.Reduced need for corrective actions on telemetry signal availability
- 3.Customer can focus on providing clean and processed waste water
