# **UK600** Open to everything

Thanks to its modular basic set-up, its improved room concept and its numerous smart detail solutions, the newly developed UK600 series of flushmounted consumer units and media enclosures offers maximum flexibility for every installation idea, no matter how unusual.

The days when products imposed limits on your wishes and ideas are now over with this new generation of combi enclosures.

# **Working together** for the best solution

With the combined consumer units and media enclosures of the UK600 series, there are no limits to your ideas. With variants from 12 to 60 space units, the combi enclosures offer enough space for all imaginable installation elements and with media combinations that even give additional space for comprehensive media equipment. The detailed solutions of the UK600 make the combi enclosure so flexible that even subsequent changes or additions are possible without much effort. With a multitude of available design doors, the UK600 may also be easily integrated into your room concept.

# **The smart solution** for every installation task

Next to the product quality, the flexibility of the enclosures is of utmost importance for installers in their daily business. The clever room concept and many detailed solutions of the new UK600 guarantee simple, safe and flexible installation that saves up to 10% in time. Different size and configuration options combined with clever connection also allow adapting the room offer to all possible requirements. This guarantees that the installer is optimally prepared for the needs and wishes of his customers with the UK600.

# **UK600 product portfolio** at a glance

The enclosures of the UK600 series are available in three basic versions: As a consumer unit, as a pure media enclosure or as a combined variant. The combi enclosure offers a shielded area for media components. This allows you to meet every imaginable installation requirement very quickly and effectively with the UK600 enclosures. Optionally available connecting elements simplify professional coupling of different enclosures in case of larger space requirements of your installation.

#### 01 Consumer unit details

- Up to 200 % extended connectionspace
- Available in up to 5 rows
- Wire holder for cable entry
- Cable entry from the side or rear wallPatented TIP-in-closure, possibility
- to insert a closure with lock
- Flat trim frame, adjustable to uneven surfaces
- Door and frame available in different design variants
- Connection set for horizontal and vertical connection

#### 02 Media enclosure details

- 6- or 12-fold patch panels with
- knock-outs for keystone modules

  Removable modular perforated
- sheet steel mounting plateTriple socket, swiveling
- Device holder with rubber, flexible assembly in several steps
- Wifi doors with plastic insert
- Doors with ventilation holes

#### 03 Combi enclosure details

- Combination of 2/3-row consumer unit and additional multimedia module
- Partition for the separation of voltage levels
  Sockets may be integrated
- into the partition
- Removable modular perforated
   sheet steel mounting plates

#### UK600 PRODUCT PORTFOLIO

02 **Hollow-wall** With an appropriate accessory set, any UK600 can be easily and reliably mounted to hollow-walls.

01

02

#### Three variants, five sizes

We supply the UK600 in five sizes with one to five rows and / or space for 12 to 60 space units. The enclosures may be used with the relevant accessories in massive or hollow-walls. Depending on the type, different accessories are included in the scope of delivery.

#### Overview UK600 product portfolio

	12 space units	24 space units	36 space units	48 space units	60 space units
<b>Consumer unit</b> basic version without trim frame and door					
<b>Consumer unit</b> standard version with trim frame and door					
<b>Media enclosure</b> with trim frame and ventilated door					
<b>Combi enclosure</b> with trim frame and door					111

# The right part

for every type of application

You can also order the enclosure parts according to your project phases. Thus, you will only receive those elements that you need at a given time. Starting with the enclosure, we deliver e.g. in the second step, the interior equipment with device support, terminals and cover for the actual installation. In the third delivery step you will then receive the selected trim frame and the matching door to complete your installation.

#### Orders in line with the project stages

This new order option allows you to realize projects without time- and space-consuming temporary storage of components that are not yet needed. Defects or losses due to improper storage on the construction site are now a thing of the past. You will no longer have to waste time searching for interposed components.

01 Step 1 Wall box incl. assembly template and plaster plate to protect against contamination.

02 Step 2 Device support with terminals and cover.

03 Step 3 Trim frame with sheet steel door.

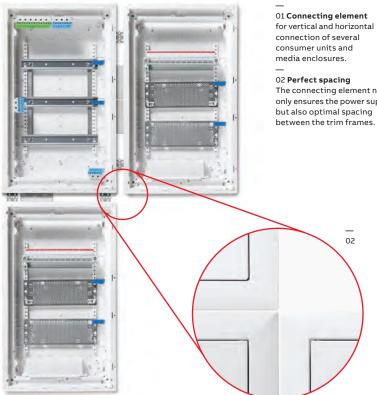

#### Extension and combination options

The enclosures of the UK600 series come with matching connectors that allow both horizontal and vertical connection of multiple combi enclosures. The connecting element is not only used to accommodate the cables, but also guarantees the correct spacing of the individual enclosures for a gap-free combination of the trim frames.

for vertical and horizontal

02 **Perfect spacing** The connecting element not only ensures the power supply but also optimal spacing

## **The UK600 consumer unit** Smart down to the last detail

Our consumer units of the UK600 series convince with their many new and unique technical features. The 200% extended connection space allows for simple and efficient installation of devices. The removable device support can be placed into the enclosure as required and thus also guarantees simple installation. Smart details such as the cable inlets with integrated terminal fixture and the variable use in massive or hollow-walls emphasize the high flexibility of the enclosure.

01 **The generous wiring space** considerably facilitates installation works.

02 **The cable inlet** comes with integrated terminal carrier and thus facilitates the installation.

03 The different sized terminals can be very easily connected to the top, bottom or sides of the enclosure.

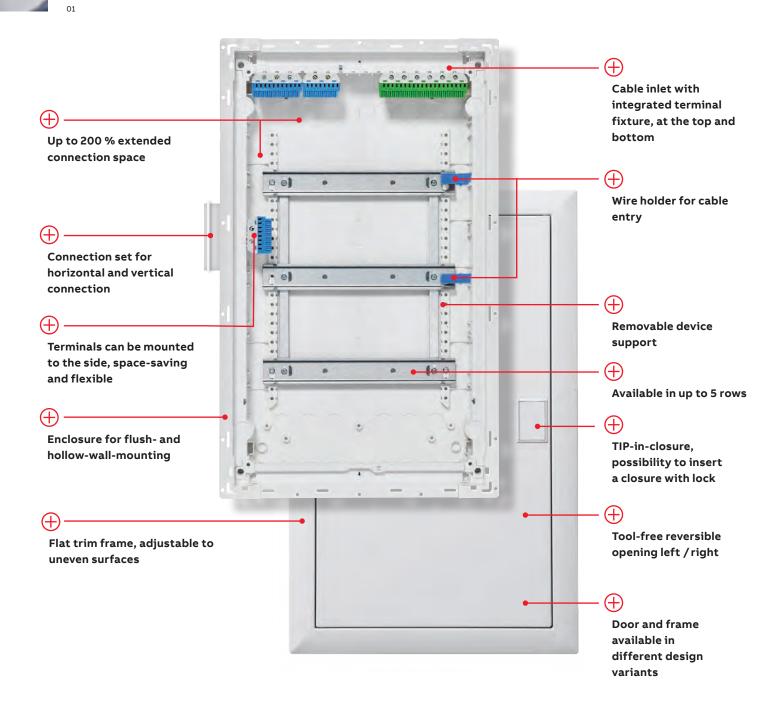

#### $\oplus$

• Project phase packaging

- Quick-action screw sealable
- Connection set for horizontal and vertical connection of several enclosures
- Surface-mounting frame for partially recessed assembly
- Integrated numbering in the cover
- Reserve of up to 10 space units

# The Internet has a new home

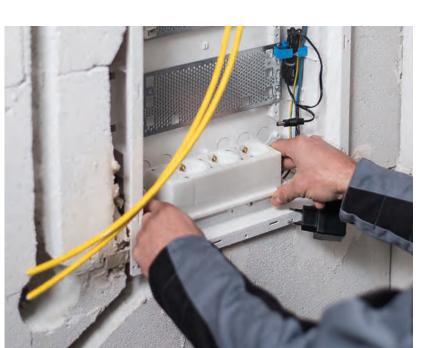

With its remarkable interior, the UK600 serves as a comfortable media enclosure. Here, all conceivable devices such as routers or media modules find their safe space. Modular perforated sheet steel plates allow for easy installation of the devices and an integrated swiveling triple socket ensures the power supply.

01 **Insertable wire holders** help with clear cabling.

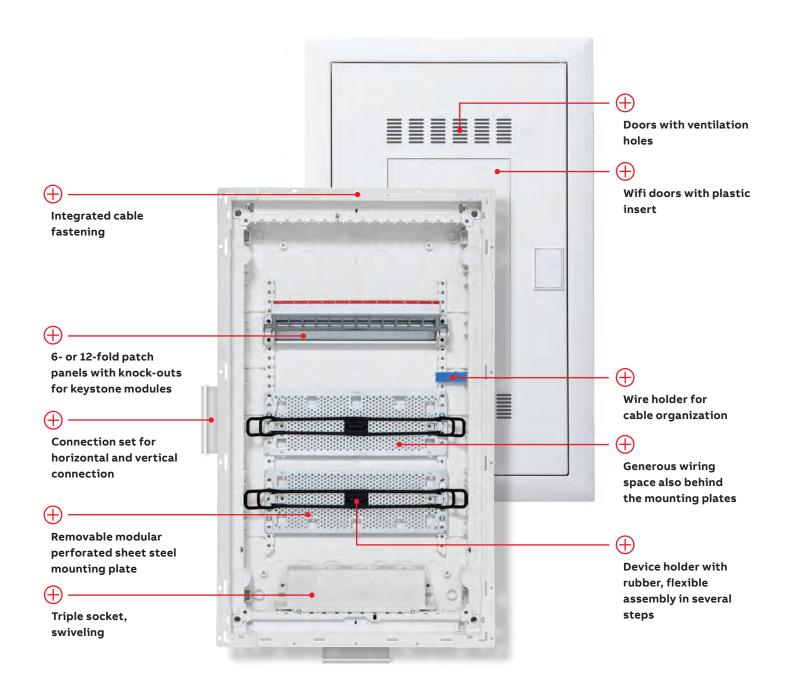

02 **The swiveling triple socket** makes the connection of different power supplies very easy. 01

#### $\oplus$

- Up to 200 % extended connection space
- Available in up to 5 rows
- Quick-action screw sealableEnclosure suitable for flush-
- and hollow-wall-mounting
- Connection set for horizontal and vertical connection of several combi enclosures
- Surface-mounting frame for partially recessed assembly

With this innovative combi enclosure, we combine the functions of a consumer unit with the ones of a media enclosure. A flexible partition is used to separate the media and consumer unit part from each other. To do so, you may for both parts rely on the innovative assembly details of the UK600.

01 **Partition** The sockets required for the media devices may very easily be integrated into the partition.

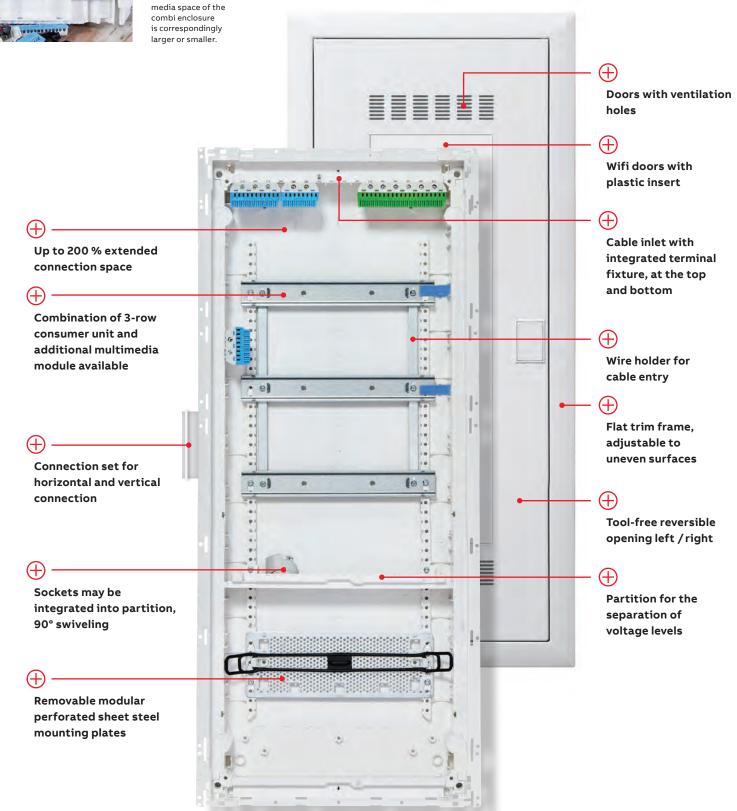

- Up to 200 % extended connection space
- Available in up to 5 rows
- Quick-action screw sealable • Enclosure suitable for flush-
- and hollow-wall-mounting
- Surface-mounting frame for partially recessed assembly

## All highlights at a glance

Our new UK600 is so special for its combination of a multitude of smart product features and device details. All together they create the smartest consumer unit on the market, which makes building installation simpler, more efficient and significantly more flexible.

05

06

01 Snap-on cable inlet with integrated terminal fixture offering 80 % more cable inlet space.

02 Integrated option to fasten wires using cable ties.

03 Up to 200 % more wiring space and "slide in" wire holder.

04 Innovative connection set for horizontal and vertical connection of several combi enclosures.

05 Easy to assemble hollow-wall-mounting set, reusable.

06 Available in up to 5-rows if larger spaces are required.

07 High flexibility thanks to laterally assembled N / PE terminals.

08 Snap-on patch panel with for 6 or 12 keystone modules.

— 04

10

— 09

12

09 Media doors, available as Wifi-friendly and ventilated versions.

10 Triple socket, 120° swiveling and to be snapped-on to cable inlet.

11 Modular perforated sheet steel mounting plate.

12 Device carrier (rubber), assembly without tools (snap on trap).

#### 13 Combi enclosure for state of the art installation. Combination of consumer unit and media enclosure.

14 Partition prepared for media applications, integratable socket (90°swiveling).

15 Flexible installation thanks to lateral and rear cable entry.

16 Stable, removable metal device support.

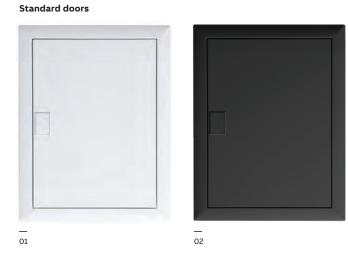

# **UK600** Smart technology nicely packaged

A special feature of the UK600 consumer unit and media enclosures is the large number of available door variants, where you will find a suitable solution for every room concept. Regardless of whether it is installed to a sober function room or styled living area – with our door variants, your consumer unit becomes a design element. There are no limits to your ideas.

The new UK600 convinces installers and planners with its flexible possibilities.

# The right door for every application

A special highlight of the consumer units and the media enclosures are the various door and frame designs which help you turn them into an attractive design feature in your home. You can insert your own pictures, pinboards, mirrors, magnetic boards, wooden or stainless steel look panels or LED panels for backlight foils into the design frames.

06 Interchangeable design frame with foam felt insert for use as pinboard.

07 Interchangeable design frame with magnetic wall insert in light wood decor.

08 Interchangeable design frame with neutral use in stainless steel look.

09 Interchangeable design frame with individual image as an insert.

10 Interchangeable design frame with LED panel and backlight foil as insert.

08

## As individual as you – our interchangeable design frames

Our doors with interchangeable design frames enable you – just like a interchangeable picture frame – to equip the frame made of brushed aluminium with a motive of your choice. When closed, the elegant frame sits with a shadow gap of 5 mm in front of the wall. Magnets integrated in the interchangeable design frame keep the door securely closed.

#### Let your creativity take over

There is a total of six different design variants available. You may choose from a crystal mirror, a grey felt insert as a pinboard, a wood decor or stainless steel look, and a classic removable frame with protective glass and back wall. Here, you may insert individual pictures, photos or e.g. escape plans. Optionally, it is also available with rear LED lighting, which gives you the possibility to insert individual backlight foils to further emphasize the selected motive. 01 Two hinges are used to attach the interchangeable design frame to the supporting trim frame.

02 The interchangeable design frame comes in brushed aluminium and guarantees a timeless and elegant look.

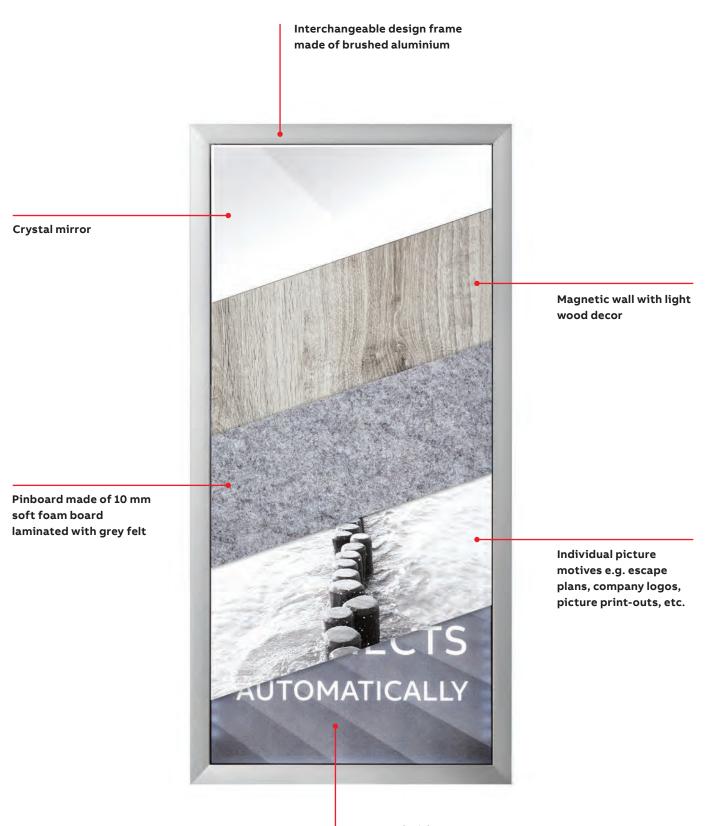

03 A large number of inserts ensures maximum flexibility.

04 Equipped with a crystal mirror, the interchangeable design frame fits discreetly into any room.

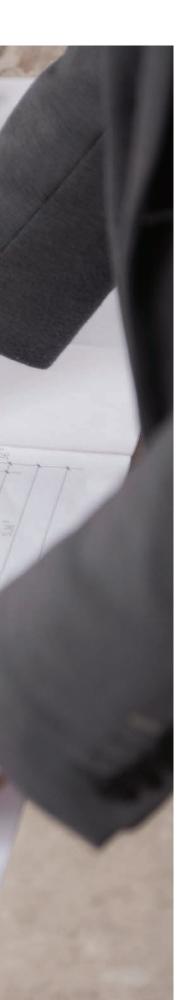

LED panel with transparent backlight foil, illuminated on both sides

## **UK600** Order information and technical specifications

On the following pages you will find all the necessary details and ordering information for our consumer units and media enclosures.

On our website abb.com/lowvoltage you will find all further information, selection guides and installation instructions for the other ABB installation products. From simple circuit breakers to complex smart home applications.

## N/PE quick-terminals

Standardized, future-oriented and flexible

### Configure based on your needs

The modularity and the extensive range of products allow customizing the products to the needs based on real-world use. Various quick-terminals can be combined on one quick carrier as necessary. If a larger N or PE terminal has to be used, simply connect two quick-terminals using the ZK10P10 connecting bridge.

#### **Product benefits**

- Flexible terminal system for several N potentials: Screw connections: 2.5 to 25 mm<sup>2</sup> for rigid conductors; for flexible conductors up to 25 mm<sup>2</sup> (wire end sleeves required)
- Spring connection: 1.5 to 4 mm<sup>2</sup> for rigid conductors; for flexible conductors up to 25 mm<sup>2</sup> (wire end sleeves required)
- Optimal when using several residual current circuit breakers
- Ease of expansion using connecting bridges
- Precise assignment of the terminals by clear colour coding: N = blue, PE = yellow-green
- Easy labelling of the terminals using pre-printed, self-adhesive number strips
- Wide range of applications: may be used in the UK600 and MISTRAL65 consumer unit series, in all compact distribution boards, and with all meter cabinets, wall-mounting and floor-standing cabinets

# Combi enclosure UK600

# With trim frame and door

Flush-mounted consumer units – UK600, IP30 , ; *
<i>I</i> <sub>n</sub> up to 63 A
Combi enclosure as consumer unit and media enclosure
dimensions according to the standard enclosures as per DIN 43871
For building installation according to DIN 18015
Mechanical impact strength: IK07
Available as 2 or 3 row versions as flush-mounted consumer units
Can be upgraded for surface-mounting or partially recessed mounting
Upgradeable for hollow-wall-mounting using UZ91P4
Wall box:
- non-warp, break-proof, non-flammable, low-halogen plastic
- with cable strain relief comb
- with detachable cable inlets
- combinable
Reversible opening (tool-free)
Communication channel for horizontal and vertical connection
With N/PE quick-plug terminal
Cover with 90° quick-action screws, lead-sealable
45 mm slots for 12 devices, expandable to 14
Labelling system
Standardized separation of the voltage levels using a partition with knock-out for socket and media modules
Modular perforated sheet steel mounting plate for devices
Simple and tool-free installation of the devices using the "device strap"
"Click in" socket, swiveling 90° for the power supply of built-in devices
Wire holder for professional cable organization
With trim frame and sheet steel door or sheet steel door with white plastic insert,
for improved Wifi signal, with surface compensation
*in connection with hollow-wall-mounting set UZ91P4
