

To ABB Front End Sales - OEM market

Circular letter nr. 01/2010

Subject :
VSC3 temporary stop of sales.

During some tests made for R&D purposes, it was discovered that under particular conditions an unexpected behaviour of the V-Contact VSC3 interruptive chamber occurred. This may affect the electrical endurance of the apparatus.

As a consequence of the above, as a preventive measure the commercialization of V-Contact VSC3 is suspended until further notice.

VSC7 or VSC12 (for back to back capacitor bank switching) shall be offered as an alternative.
