

TYRAK Midi II DC Drives (YGMU, YHMU)

Current life cycle status

The TYRAK Midi II DC Drives (YGMU, YHMU) is in the Obsolete phase since 1.1.2018 according to the ABB life cycle model outlined above.

Life cycle plan

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions

It is recommended to perform a Retrofit or to replace the TYRAK Midi II with an appropriate drive from a new product family.

Further information

For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.
