G6403e – ABB drives for water ACQ580 startup, Internet course

Course type

This is a web-based training course.

Course duration

The course duration is approximately 15 minutes.

Course goal

The goal of this course is to get an overview of the startup features of ACQ580 drives for water.

Student profile

This course is intended for sales managers, sales engineers, product managers, anyone selecting or dimensioning an ACQ580, or for anyone wanting to know how to commission ACQ580 drives for water.

Notes

If you have no experience of working with drives, it is highly recommended to take a hands-on course in addition to this course. Then you'll be able to utilize the drive to its full potential.

Prerequisites

An Internet connection. The recommended browser is Microsoft Edge or Google Chrome.

Course objectives

Upon completion of this course, you will be able to:
- Prepare the commissioning infrastructure, such as the PC tool and panel network.
- Commission the ACQ580 using the control panel.
- Complete the "First start assistant".
- Select and configure control macro settings according to the application.
- List ACQ580 features that support easy start-up and configuration.
- List other ways of commissioning.

Main topics

- Commissioning infrastructure, such as the PC tool and panel network
- Commissioning the ACQ580 using the control panel
- "First start assistant" and configuration of the control macro settings
- Easy start-up and configuration
- Other ways of commissioning
