

US494 IRC5 MultiMove

This course is designed for students who have successfully completed our IRC5 Programming I (US420) class or equivalent and who need to only know about MultiMove. This course DOES NOT provide a review of basic programming. This class is intended for those who are already familiar with ABB robot programming but need MultiMove knowledge.

Topics include:

- Building and Configuring Robot Software for MultiMove
- Multi-Move Programming

Course Objectives: After successfully completing the course, the participant should be able to do the following:

- Create, Configure, and Download Software for MultiMove systems
- Setup and Program the Multi-Move feature

Student Profile: This course is intended for students that have attended the IRC5 Basic programming course but require knowledge of MultiMove programming features.

- Suitable for system programmers or technicians with existing / developed programming skills

Prerequisites

- Attendees must have attended the IRC5 Programming I (US420) class within the last twelve months or have adequate past programming experience. This course **DOES NOT** provide a review of basic programming.

Duration: 2 days
