

# Service package – Marine industry

## Continuous Emission Monitoring Systems (CEMS)

Secure reliable emission monitoring for your fleet with ABB's service support

**Measurement made easy**

Service solutions for Continuous Emission Monitoring Systems (CEMS)

### Why ABB?

ABB is a leader in providing emission-compliant solutions – available now for Marine industry.

Working with ABB ensures your continuous gas analyzers really do operate continuously.

### Our goal

Provide professional service support, so you can focus on your business.

### ABB service offering

ABB has the expertise to deliver dedicated maintenance services for GAA330-M and GAA630-M analyzers.

Professional commissioning and on-board preventive maintenance with genuine spare parts to minimize failures and extend product lifetime.

ABB's reliable service support to meet the environmental specifications from IMO with peace-of-mind.

All services can be combined into a Measurement Care service agreement based on the level of support you need:

- Rapid response
- Lifecycle management
- Performance improvement

Maintenance

Spares parts management

Measurement Care

## CEMS Marine service package

### Commissioning

Trouble-free start-up by a global network of factory-trained experts.

### Training

Access eLearning, site / classroom training and qualify your staff to operate on CEMS for the Marine industry.

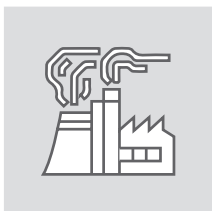

### Technical support

Get expert remote advice if the analyzer fails. One call to learn how your process can return quickly back to normal.

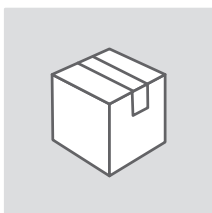

## Measurement care

ABB can bundle these services within a tailor-made service agreement to meet your needs.

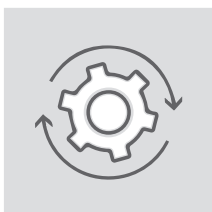

### Corrective maintenance

Expert technicians to fix unexpected problems – it's good to know ABB can help when you need it.

### Spare parts management

Stress-free – original parts and consumables for any emergency or scheduled service, 365 days a year.

### Preventive maintenance

Certified professionals performing inspections, cleaning and parts replacements on-board, at pre-defined dates.

### Calibration services

We will calibrate the measured components to meet regulatory compliance.
