

PLC Products

Wireless Automation Devices

Current life cycle status

The Wireless Automation Products Family is in the Limited phase since 01.01.2015 according to the ABB life cycle model outlined above.

Life cycle plan

It is planned to keep the Wireless Automation Products Family in the Limited phase until the end of 2015, after which it will be transferred to Obsolete phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions

It is not recommended to use devices of the Wireless Automation Products Family for extensions and new installations.

Further information

For more information on PLC and drives life cycle management and available services contact your local ABB organization or at www.abb.com/plc.
