

PRODUCT LIFE CYCLE STATUS STATEMENT

ACS6000 (Modernized with UCU-26)

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Full range of life cycle services and support

Limited range of life cycle services and support

Replacement and end-of-life services

Product subtypes concerned:

ACS6000 (Modernized with UCU-26)

Current life cycle status

The mentioned product subtype of ACS6000 drive is in Active phase according to the ABB life cycle model outlined above.

Life cycle plan

There is no plan to stop sale of the ACS6000 Modernized service and hence there is no plan to change the life cycle status of this product subtype.

ABB will adequately inform about life cycle phase transition from Active to Classic life cycle phase prior to the change.

ABB's promise is to keep this product subtype after Active phase at least 10 years in Classic life cycle phase or at least to provide a modernization service to extend the full life cycle support to at least 10 years.

Product availability in Active phase

This product subtype is not available for sale. It represents drive installations, where the recommended life cycle upgrade services have been applied.

Recommended actions

Besides the regular maintenance, it is recommended to check the possibility for additional Upgrade services in order to respond to specific customer needs and/or changed process requirements.

Due to the shorter life cycle of the control hardware, ABB strongly recommends combining an eventually available modernization service with the 10-year preventive maintenance.

Service availability in Active phase:

ABB Motion OneCare agreements
Trainings (e-learning, classroom, on-site, virtual)
Spare parts
ABB Ability Condition Monitoring for Drives
Preventive Maintenance
Inspection and Diagnostics
Technical Support
Remote Support
On-site repair
Option upgrades
Disposal and recycling

See details at new.abb.com/drives/Services and contact your local ABB representative for availability.
