

# Common Drive Control (CDC) System (APC2)

## Current life cycle status

The Common Drive Control (CDC) System (APC2) is in the Obsolete phase since 1.1.2017 according to the ABB life cycle model outlined above.

## Life cycle plan

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

## Recommended actions

It is recommended to replace the APC2 with the latest generation controller, e.g. AC500 or AC800M.
