

Open up a new world of water analysis

ABB's range of advanced water transmitters

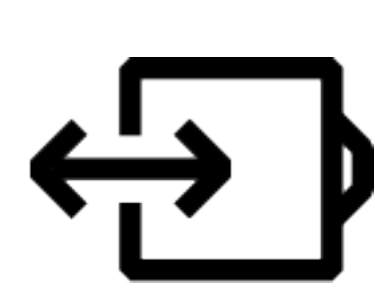

Combining the latest developments in intelligent diagnostics and management with ABB's intuitive HMI operation and modular design philosophy. The AWT range of smart water transmitters provides the greatest user flexibility while making operation and maintenance simpler.

Plug-and-play sensor and the communication modules provide fast upgrading and increase plant availability

Easy-to-use common HMI simplifies routine operation and reduces operational expenditure

EZLink™ sensor connectivity gives smarter, faster and more accurate measurement
