

Optimization of production and costs

Customer

Hermes International food factory
Croatia

Customer needs

Improvement in reliability and efficiency of the production process and optimization of production and costs

1100101001

Solution offering

The cloud-based ABB Ability™ Electrical Distribution Control System (EDCS) and Ekip UP digital units

[More information](#)

“

During installation, ABB has proven to be a strong player in terms of collaboration, teamwork and understanding our needs.

”

- ✓ Using ABB Ability EDCS and Ekip UP enables Hermes to monitor energy and drive power peak shaving by managing different loads.
- ✓ ABB digital solutions allow modifications during the production process and provide complete analytics for energy resources that can help improve productivity while reducing electrical consumption costs.
- ✓ Ekip UP allows power peak shaving totaling 25 percent to 30 percent of average active power during 15-minute intervals.
