COURSE DESCRIPTION

Megadrive LCI Expert Days
Classroom training in Turgi, Switzerland

Learning objectives

- Advanced system and application know-how
- Analysis of field cases and improvement of troubleshooting skills
- Exchange of experience within global service community and site feedback collection
- Strengthen the network between field service engineers and the MVD Center of Excellence (technical support, product managers, quality team, R&D, etc.)

Learning content for the following products

LCI MV Drives with PEC control platform

Methods

High focus on hands-on exercises, case study workshops, interactive expert talks, Q&A sessions, etc.

Participant profile

Field service engineers and other technical personnel working with LCI MV Drives.

Pre-conditions

- Expert certificate of the corresponding product(s) or Basic certified personnel who want to achieve the corresponding Expert level
- Completed MV Drives Expert Session within the last 6 months

(Re-)Certification concept

To keep the Expert certification, it is required to attend the face-to-face Expert Days every 3 years. In addition, the yearly attendance of the Expert Session is required.

Location

ABB Switzerland Ltd.
Learning Center MV Drives
Austrasse
CH-5300 Turgi / Switzerland

Please bring your service laptop with the installed drive tools.

INVITATION

MV Drives Expert Days/Sessions Schedule

Due to the limitation of the seats, we recommend enrolling in the training as early as possible. The deadline for registration is 10 days before the Expert Days start.

1. Expert Session, October 2023

- Based on our experience we made in the last 1,5 years, since we introduced the Expert Session, we decided to hold the Expert Session in autumn only in case of critical training needs.
- Check the latest status and schedule here: MV Drives Expert Sessions - schedule
